

NCFI Sealite® Residential Insulation Procedures for Warranty on Sealite

NCFI Polyurethanes will provide Sealite Insulation warranties for Residential applications when the following conditions are met:

1. NCFI Sealite Insulation must be installed by a Gold Star certified applicator.
2. NCFI Sealite Insulation must be the only insulation used in stud wall applications. This does not preclude the use of exterior insulating sheathing boards.
3. NCFI Sealite may be used in conjunction with other types of insulation in ceiling, attic, or roof deck applications when pre-approved by NCFI. Contact NCFI with the details of the insulation plan prior to the application. This method of insulation will only be approved if the NCFI Sealite is applied to a minimum thickness of five inches.
4. An NCFI Sealite Warranty Application must be submitted within one week of application of the Sealite insulation.
